Robotics Science & Systems — 2014 Rebuttal Form

Please note that the area chairs and the program chair will make every effort to address issues in the first two questions.

1. Are there factual errors in the reviews? (max. 400 words) Comment on facts only, not opinions. For example, if the reviewer says that your assumptions are too restrictive, this is an opinion. However, if the reviewer says that your algorithm is exponential when it is cubic, this is a factual error. *(text box)*

2. Is there any serious misunderstanding in Reviewer's explanation of the Overall Recommendation (Question 14) that the area chairs and program chair should attend to? (max. 400 words) *(text box)*

3. Please use up to 400 words to address any other points you wish. *(text box)*
